Receive Emergency Notifications to Your Cell Phone Via The Everbridge App

The Emergency Notification System (powered by Everbridge) is a tool that is used by 9-1-1 call centers in El Paso and Teller Counties to warn the public of any situation that is deemed an emergency by officials that poses a threat to life or property. We are pleased to announce the addition of the Everbridge App to the Emergency Notification System. By downloading the Everbridge app citizens can:

- Add another channel of communication so you never miss an important alert.
- Receive push-alerts anytime you travel into an area of an active “incident”.
- See a map of messages affecting where you live, work, and travel.
- Opt-in immediately and anonymously.

In an emergency, communication channels can sometimes fail under adverse conditions because of low bandwidth or connectivity. The Everbridge App helps make communication redundant and more reliable by adding another channel to receive emergency alerts.

Download the App on Google Play or the App Store.

You can also register to receive alerts via text, email, or phone call. Visit www.elpasoteller911.org to learn more.
